

Labelling Solutions Guide

Welcome

In almost every professional setting today, there is an increased focus on creating a work environment that is safer, more productive, and more efficient. When things do go wrong, organisations need to be able to effectively respond so they can get back to delivering the best product or service possible to their customer. DYMO® can help. With a full offering of label makers and labels, DYMO can assist organisations with a broad array of labelling applications. From labelling file folders to marking pipes, identifying cables, and printing barcodes used to track inventory, DYMO has a solution that can help improve the safety and productivity of almost any work environment.

This catalogue is intended to serve as a tool to help you identify and learn about the various labelling opportunities within specific industries and their corresponding DYMO labelling solution. Included in this guide are a series of facility maps representing the following environments: Data Centres, Education, Healthcare, Hospitality, Manufacturing, and Office. Use these maps to identify the various labelling applications found within each facility. The corresponding overview section for each environment provides valuable information on the DYMO difference for each application, as well as insight into who may be responsible for making the purchasing decision. Last, to support the maps you will also find detailed labelling application guides that provide product recommendations and an overview of each application, showing the advantages that labelling can provide.

DYMO is how labelling gets done.

Data Centre

Labelling with DYMO in the Data Centre

Proper labelling of infrastructure components is essential to efficient data centre operations. The DYMO line of professional-grade label printers meet ANSI/TIA-606-B standards and can be used to clearly label racks, cabinets, wires/cables, patch panels and ports for fast identification.

The information contained in this Data Centre Guide is being provided for general information purposes only and is based on current standards which are subject to change.

Education

Labelling with DYMO in the Education Environment

DYMO printers and labels satisfy a wide range of labelling needs across educational campuses – while eliminating the ongoing expense of ink and toner. Use DYMO labellers to print visitor badges, label audiovisual and security equipment, manage asset tracking, employ barcoding, and keep an entire facility well organised and operating smoothly.

Education | Overview

Labelling Opportunities

The DYMO Difference

Application Guides

A **Asset Tracking/Barcoding**
Commonly used for inventory management, barcode labels allow the ability to store and organise varying amounts and types of data.

DYMO offers printers and software that print a range of barcode symbologies, including QR codes. Choose from a variety of label materials and label layouts to print customised tracking labels.

See application guides
Asset Tracking p 16
Barcodes p 18

AV **Pro AV/Security**
Label audiovisual, security components and network systems for easier maintenance and reduced down time.

Use DYMO industrial labellers to make customised cable wraps and panel labels in just a few simple steps. DYMO coloured labels are perfect for categorising and colour coding components, which make any job look professional and organised.

See application guide
Pro AV/Security p 34

CM **Cable Management**
Labels help to quickly and easily identify cables or wires and can be placed in a location that is easy to read, even in hard-to-reach areas.

DYMO Industrial labellers and labels are tough, affordable and long lasting. Speed productivity with templates to print for specific diameters so that a label can be read from any angle once applied to the cable.

See application guide
Cable & Wire p 20

D **Networking/Datacom**
Labels used to identify patch panels, faceplates, servers, racks, wireless access points, lighting control systems, power over ethernet circuits and more. Labelling helps to ensure consistency across the installation.

DYMO industrial label makers are designed by installers for installers to properly label network installations and meet ANSI and TIA-606-B industry labelling standards. Create patch panel labels and all corresponding cable and faceplate labels without having to retype your data.

See application guide
Networking Components p 30

F **Maintenance, Repair & Operations**
Label equipment, chemicals, shelving and networks to enhance productivity and performance.

DYMO provides a variety of products to make your facility safer and more organised. Use DYMO labellers to print coloured vinyl labels, pre-sized safety labels and apply 5S standards in just a few easy steps, or print batches of durable polyester labels – perfect for tracking assets, marking beams and more.

See application guide
Maintenance, Repair & Operations p 24

G **General Organisation**
Labels used for files, binders, and identification, provide an efficient way to simplify the everyday work flow in and around the office.

DYMO offers a variety of labels including specific labels for folders, bins, shelves and media products to help quickly organise any space and increase efficiency. DYMO label makers and printers are designed with time-saving shortcuts, saving time and money.

See application guide
General Identification p 26

M **Mailing & Shipping**
Quickly print address, shipping and postage labels on demand.

DYMO labellers integrate easily to meet mailing and shipping needs. Print address labels and 4-inch wide shipping labels. Use DYMO Label™ software to import your contacts from MS Outlook® or Excel® to create hundreds of labels in no time.

See application guide
Mailing & Shipping p 30

V **Visitor Management**
For quick, on-demand printing of name badges to help support the visitor check-in process.

Choose from a proven line of easy-to-integrate DYMO labellers that uniquely meet visitor management needs. No more messy ink cartridges or printing ribbons. Choose name badge labels made from paper or a durable polyester.

See application guide
Visitor Management p 38

5S Visual Workplace

What is 5S?

5S is a key component to the “visual workplace” system where workers are presented with important visual information in the locations and at the times it is needed within a facility. The purpose of the 5S system is to organise a workspace in the most efficient and effective means possible. This can be achieved by identifying, using, and storing items in a standardised manner that is understood and adhered to by all team members.

Why label for 5S?

A cost effective and efficient way to implement 5S practices in any facility, labelling can facilitate:

- Colour-coding for quick visual reference
- Identification of assets, workspaces, etc.
- Uniform communication throughout the facility

Benefits of implementing

- Increased worker productivity
- Reduced costs associated with loss and breakage
- Creates an overall safer work environment

Breaking down the 5S system

The 5S's	What does it mean?	How to implement?
SORT	Eliminate all unnecessary tools, parts, and instructions.	<ul style="list-style-type: none">• Colour code with labels• Designate workspaces
STRAIGHTEN	Arrange tools, parts, and instructions so that all have a clearly marked “home”. Items used most frequently should be the easiest and quickest to locate.	<ul style="list-style-type: none">• Label both the tool and its designated home space
SHINE	Clean all workspaces and equipment, keeping everything clean, tidy and organised.	<ul style="list-style-type: none">• Set a designated time to clean an area
STANDARDISE	Set uniform procedures and workstations through the facility to promote interchangeability.	<ul style="list-style-type: none">• Create standardised workstations• Train on maintaining work areas
SUSTAIN	Enforce adherence of all rules and procedures to prevent unfavorable practices from returning.	<ul style="list-style-type: none">• Implement regular audits

5S Solutions from DYMO

Meet your 5S needs with industrial labelling solutions from DYMO. Designed to work exclusively with DYMO label makers, DYMO XTL™ and IND labels are tough – jobsite tested and UL recognised. Whether you're labelling to OSHA, ISO and ANSI colour standards or labelling in harsh conditions, DYMO XTL and IND labels have you covered.

Visit dymo.com.au or dymo.co.nz for details.

XTL All-Purpose Vinyl and IND Vinyl Labels

Ideal for indoor/outdoor applications.

- UL recognised as a component to UL 969
- RoHS compliant
- UV, water, oil and chemical resistant
- XTL temperature rating: -40°C to 60°C
- IND temperature rating: -40°C to 80°C
- XTL length: 7.5 m
- IND length: 5.5 m

Available Colours

IND Embossing Labels

For heavy-duty, extreme condition labelling.

- Ideal for marking pipelines, underground cables, engine parts, building materials and more
- Compatible with Rhino M1011 Embosser Kit only

Asset Tracking

What is asset tracking?

Asset tracking refers to the process by which many organisations track the movement of physical assets within their facilities.

Some organisations choose to manage their process with special asset tracking software that can be paired with barcode labels to facilitate easy scanning of an asset. When using barcode labels it is important to consider a variety of criteria before selecting a label:

- Will the label accommodate a barcode?
- What type of environmental conditions will the label have to stand up to?
- Will the label stick to the surface it will be applied to?
- Will the text printed on the label smear or fade over time?

Implementing asset tracking can help to:

- Reduce loss of items
- Increase productivity
- Manage assets
- Improve audits

Commonly tracked items include:

Inventory

Tools

Equipment

IT Assets

Importance of Barcode Labelling

Regardless of an operation's size, tracking and managing assets using barcodes can be an inexpensive and efficient way to ensure items are in order and accounted for.

DYMO provides a full suite of labellers capable of printing a variety of barcode symbologies. Use the chart below to determine the DYMO product best suited to meet your barcoding needs.

XTL All-Purpose and IND Vinyl Labels

- Ideal for indoor and outdoor applications.
- UL recognised as a component to UL 969
- RoHS compliant
- UV, water, oil and chemical resistant
- XTL temperature rating: -40°C to 60°C
- IND temperature rating: -40°C to 80°C
- XTL length: 7 m
- IND length: 5.5 m

Available Colours

XTL Permanent Flat Surface

IND Permanent Polyester

Professional, polished finish. Ideal for flat surfaces.

- UL recognised as a component to UL 969
- RoHS compliant
- UV, water, oil and chemical resistant
- XTL temperature Rating: -40°C to 60°C
- IND temperature Rating: -40°C to 150°C
- XTL length: 9 m
- IND length: 5.5 m

Available Colours

XTL Pre-Sized Labels

- Ideal for flat surface labelling.
- Help facilitate batch label printing
- UL recognised as a component to UL 969
- RoHS compliant
- Temperature Rating: -40°C to 60°C

Available Colour

D1 Standard

Suitable for many tasks and can be removed without leaving residue. Made of polyester.

- UV and water resistant
- Temperature rating: -40°C to 90°C

LW Labels

- For use in LabelWriter series printers
- Uses a direct thermal printing process
- Permanent white paper or polypropylene labels, ideal for most labelling jobs.

Barcodes

Why use barcodes?

The use of barcodes is a common practice in many industries because of their ability to store and help organise varying amounts and types of data. When linked to a database, barcodes can also help to expedite recall and updates of information for a more efficient workflow. Using barcodes supports the fast identification of items which can help to:

- Reduce human error
- Increase productivity
- Manage assets
- Improve audits

Common Applications:

Originally developed to identify railroad cars in the 1960s, the use of barcodes and barcode labels has evolved to span a variety of industries and applications.

When selecting a barcode label, be sure to ask the following questions:

- Will the label size accommodate a barcode?
- What type of environmental conditions will the label have to stand up to?
- Will the label adhere to the selected surface?

Barcode Symbolologies

- **Linear barcodes (1D):** made up of lines and spaces to create patterns (ex. UPC code)
- **Matrix barcodes (2D):** can store much more data than a linear barcode in a smaller amount of space (ex. QR code)

Below are examples of the barcode symbolologies supported by DYMO products.

Barcode Symbology	Common Uses
Code 39 (Code 3 of 9) 	<ul style="list-style-type: none">• Name badges• Inventory• Industrial applications• Required for government and Dept. of Defense
Code 128 	<ul style="list-style-type: none">• Used worldwide• Compact in size
Interleaved 2 of 5 	<ul style="list-style-type: none">• Warehouses• Distribution• Industrial applications
UPC A 	<ul style="list-style-type: none">• Point of sale trade items

Barcode Symbology	Common Uses
UPC E 	<ul style="list-style-type: none">• Point of sale trade items• Used when space is limited

Recommended labels for Barcodes

Additional sizes and colours available. Visit dymo.com.au or dymo.co.nz for details.

XTL All-Purpose Vinyl and IND Vinyl Labels

- Ideal for indoor and outdoor applications.
- UL recognised as a component to UL 969
 - RoHS compliant
 - UV, water, oil and chemical resistant
 - XTL temperature rating: -40°C to 60°C
 - IND temperature rating: -40°C to 80°C
 - XTL label length: 7 m
 - IND label length: 5.5 m

Available Colours

XTL Permanent Flat Surface and IND Permanent Polyester

- Professional, polished finish. Ideal for flat surfaces.
- UL recognised as a component to UL 969
 - RoHS compliant
 - UV, water, oil and chemical resistant
 - XTL temperature Rating: -40°C to 60°C
 - IND temperature Rating: -40°C to 150°C
 - XTL label length: 9 m
 - IND label length: 5.5 m

Available Colours

XTL Pre-Sized Labels

- Ideal for flat surface labelling.
- Help facilitate batch label printing
 - UL recognised as a component to UL 969
 - RoHS compliant
 - Temperature Rating: -40°C to 60°C

Available Colour

D1 Standard

- Suitable for many tasks and can be removed without leaving residue. Made of polyester.
- UV and water resistant
 - Temperature rating: -40°C to 90°C

LW Labels

- For use in LabelWriter series printers
- Uses a direct thermal printing process
- Permanent white paper or polypropylene labels, ideal for most labelling jobs.

Cable & Wire

Cable and wire identification refers to the markers or labels that are typically affixed to a cable or wire for identification purposes. These markers provide a quick and easy way to identify a cable or wire and can be placed in a location that is easy to read, even in hard-to-reach areas.

Benefits of implementing

- Helps facilitate quick and easy identification of wires and cables
- Helps reduce repair time by eliminating the need to guess what a wire or cable is for
- Helps minimise down time from repairs that could take longer than expected if cables remain unidentified

The most common type of cable/wire markers are:

Flags

- Ideal for identifying thin wires
- Provides a flat surface for placement of text, barcodes, etc.
- Recommended material: Vinyl

Wraps

- Information is repeated on the label so it can be read on any side of the cable/wire
- Recommended material: Vinyl, Flexible Nylon, and Flexible Cable Wrap

Heat-Shrink Tubes

- Provides a permanent way to mark a cable or wire
- 3:1 shrink ratio ensures a secure fit

What size heat-shrink tube do I need?

Heat-shrink tubes vary in width, so the easiest way to determine the size of tube needed is to know the diameter of the wire or cable being identified. Use the chart below to help determine the size of DYMO heat-shrink tube needed for your wire or cable.

DYMO Heat-Shrink Tubes meet the following certifications:

- UL recognised as a component to UL 224
- Meets MIL-STD-202G, MIL-M-81531 and SAE-DTL 23053/5 (Class 1 & 3)
- RoHS compliant

DYMO Heat-Shrink Tube Width		Minimum Cable Diameter		Maximum Cable Diameter		Minimum AWG	Maximum AWG
in	mm	in	mm	in	mm

XTL All-Purpose Vinyl and IND Vinyl Labels

Ideal for both indoor and outdoor applications.

- UL recognised as a component to UL 969
- RoHS compliant
- UV, water, oil and chemical resistant
- XTL temperature rating: -40°C to 60°C
- IND temperature rating: -40°C to 80°C
- XTL length: 7 m
- IND length: 5.5 m

Available Colours

XTL Flexible Cable Wrap and IND Flexible Nylon

Specifically designed for curved surfaces and wire and cable marking.

- UL recognised as a component to UL 969
- RoHS compliant
- XTL temperature rating: -40°C to 60°C
- IND temperature rating: -10°C to 80°C
- XTL length: 5.5 m
- IND length: 3.5 m

Available Colours

XTL Heat-Shrink Tube (Continuous & Pre-Sized) and IND Heat-Shrink Tube

For high-end cable identification. A 3:1 shrink ratio helps ensure a secure fit on wires and cables.

- UL recognised as a component to UL 224
- Meets MIL-STD-202G, MIL-M-81531 and SAE-DTL 23053/5 (Class 1 & 3)
- RoHS compliant
- XTL temperature rating: Max 125°C
- IND temperature rating: -55°C to 135°C
- XTL length: Varied
- IND length: 1.5 m

Available Colours

XTL Laminated Wire/Cable Wrap and IND Self-Laminating

Pre-sized wire/cable wraps with laminated overwrap protect printed areas from oil, chemicals, moisture, abrasion and fading.

- XTL Wraps also available in sheet label formats
- UL recognised as a component to UL 969
- RoHS Compliant
- XTL temperature rating: -40°C to 60°C
- IND temperature rating: -40°C to 80°C

Available Colour

*Black on yellow offered for IND Flexible Nylon labels only

Electrical

Promote safety and productivity with labelling.

The proper labelling and identification of electrical components is an easy and effective way to promote safety and productivity in any facility. Proper identification of cables and panels allows for efficient navigation of electrical installations; while the use of safety signage can help to prevent injuries that are commonly associated with the improper use of personal protective equipment (PPE).

A properly labelled electrical installation will:

- Facilitate quick identification of electrical infrastructures for trouble shooting and repairs
- Help ensure power is disabled when servicing live installations
- Assist in meeting ANSI and ISO standards
- Help inform workers of PPE to be used around the installation as well as proper shut-down procedures

DYMO offers labelling solutions for a variety of electrical applications:

Cables & Wires

- Print identifiers directly on heat-shrink tubes, ideal for identifying wires that require insulating properties
- Heat-Shrink tubing is UL recognised as a component to UL 224
- Recommended material: Heat-Shrink Tube

Safety & Warning

- Colour-coded labels (orange, yellow and red) clearly identify potential safety risks associated with equipment being serviced
- Durable enough to withstand weather, chemicals, heat, corrosion or any other environment to which they may be exposed
- Recommended material: Pre-Sized Safety and Vinyl

Panel ID

- Ensures each panel will communicate accurate information, eliminating fear of losing panel ID cards
- Vinyl is UL 969 rated; approved for electrical panel usage – indoor and outdoor
- Recommended material: Vinyl

What size heat-shrink tube do I need?

Heat-shrink tubes vary in width, so the easiest way to determine the size of tube needed is to know the diameter of the wire or cable being identified. Use the chart below to help determine the size of DYMO heat-shrink tube needed for your wire or cable.

DYMO Heat-Shrink Tubes meet the following certifications:

- UL recognised as a component to UL 224
- Meets MIL-STD-202G, MIL-M-81531 and SAE-DTL 23053/5 (Class 1 & 3)
- RoHS compliant

Maintenance, Repair & Operations

What is MRO?

Maintenance, Repair & Operations, or MRO, ensures the proper operation and organisation of all aspects of a building to create an optimal, safe and cost-effective environment for occupants. Regardless of how the facility is being used, the structure and equipment that keep its occupants comfortable and safe must be maintained on a daily basis.

Using proper and effective identification can help to:

- Maintain a clean, well-organised, consistent appearance
- Optimise functionality
- Increase productivity and longevity of assets

DYMO labels create order and efficiency within facilities:

Equipment Asset Tracking

Barcode labels identify and track equipment, helping to maintain organisation and inventory of assets.

Racks & Shelving

Use labels to aid in quick location and identification.

Safety

Colour-coded and pre-sized safety labels applied throughout a facility can help alert employees to use caution, or warn of potential dangers.

Cable/Wire Management

Use of flags, wraps and heat-shrink tube labels on wires and cables facilitate quick and easy identification, minimising down time and saving time in repairs.

Material Management

UV, water, oil and chemical-resistant labels clearly identify materials from the point of procurement through waste disposal, accountability, quality control, standards compliance and inventory reporting.

Colour-coded labelling to meet OSHA standards

The Occupational Safety & Health Administration (OSHA) requires the use of proper labelling and identification throughout facilities. DYMO labels can help to implement the applicable standards. For more information on OSHA labelling standards, visit www.osha.gov.

MRO Solutions from DYMO

DYMO offers a full range of printers to let you choose from a variety of label formats and barcode symbologies to help make identification and tracking assets in your organisation easy. Designed to work exclusively with XTL™ and Rhino™ label makers, DYMO XTL and IND labels are tough – jobsite tested and UL recognised. Whether you're labelling to OSHA, ISO or ANSI colour standards or labelling in harsh conditions, DYMO XTL and IND labels have you covered.

General Identification

Why does office organisation matter?

Establishing processes and procedures are essential to the success of any business, but one item that is often overlooked is office organisation. From finding the right files and drawers to helping colleagues book the right meeting room, general organisation and identification provides an efficient way to simplify the everyday working life in and around the office.

Some ways to increase efficiency and help save time include:

- **COLOUR CODING**

Use different colour labels to differentiate items (i.e. show what kind of material they contain or confidentiality status)

- **QUICKER IDENTIFICATION**

Label to help name and identify filing trays, CD/DVD cases and more

- **TRACK OR NOTIFY**

Label equipment, signage and instruction labels to improve people or asset flow, enabling people and assets to move around in buildings within an organised, comfortable and safe way

Additional ideas for labelling around the office include:

Files & Folders

Binders

Drawers

Shelves

Books

Media Storage

Building Infrastructure

Equipment

General Identification Solutions from DYMO

Keep any office organised, efficient and under control with DYMO LabelWriter® and LabelManager® labellers and labels.

- DYMO offers easy-to-use products with an intuitive interface to help you label quickly and easily
- Create customised labels with many fonts, styles, graphics, barcodes and more
- Labels are available in many different sizes and colours suited for every application in the office

Mailing & Shipping

Helping to improve efficiency in any mail and shipping department.

Despite the digitalisation of today's world, sending and receiving mail and packages is still an everyday necessity for most businesses. The process of sending out mailings can be a time-consuming job so it's important that it happens in the most productive, efficient and professional way possible.

Using DYMO label printers and labels for your mailing and shipping process can help you save time and have your business mailing like a pro in no time. When you use DYMO you can enjoy these great benefits:

- **Professional looking** – printed address labels eliminate handwriting errors
- **Print the precise number of mailing or shipping labels needed** – without the waste you can have with inkjet or laser sheet labels
- **Self-adhesive labels** – this means no more cutting and taping labels
- **No expensive ink or toner required** – the DYMO LabelWriter® 450 Series label printer uses smudge-proof thermal printing technology

DYMO label printers are easy to use and can help tackle a variety of mailing and shipping needs including:

Address Labels
Including return

Shipping Labels
Up to 102 x 152 mm

Mailing and shipping solutions from DYMO®

Connect a DYMO LabelWriter® label printer to your PC or Mac® and you're ready to print address labels, shipping labels and much more. These label printers make it easy to get first-class results. Thermal printing technology eliminates the cost of ink or toner and the hassle of sheet labels. Improved resolution graphics deliver crystal clear text, graphics and barcodes.

Networking Components

In today's competitive landscape, network labelling is critical.

From cables and wires to patch panels, 110 blocks and faceplates, there are a lot of components that go into a telecommunications infrastructure. A labelled infrastructure can save installers and IT professionals both time and money when it comes to maintenance, repairs and down time.

▶ A properly labelled network installation will:

- **SAVE YOU TIME**

Time invested up front can pay off when it comes time to change or repair a connection down the road.

- **SAVE YOU MONEY**

Implement labelling and help take the guesswork out of maintenance and repairs, while reducing the need for time consuming and costly toning.

- **CREATE CONSISTENCY & FLEXIBILITY**

Labelling helps to ensure consistency across the installation and provide the flexibility to work with different contractors over the life of the network.

Best practice for network labelling – TIA-606-B

Used throughout the industry, the Telecommunications Industry Association TIA-606-B standard, defines a labelling standard that maps each cable in an installation precisely to the floor, telecom room, and patch panel position or block where the cable terminates. For more information on TIA-606-B visit www.tiaonline.org.

DYMO offers a labelling solution for a variety of networking components including:

Wires & Cables

Patch Panels

Servers

Faceplates

Breakers & Modules

110 & Terminal Blocks

Save time with manufacturer templates

We've created label templates for equipment from Belden®, CommScope®, Leviton® and other leading manufacturers. Just open DYMO® ID, choose a template and add text to create labels that fit the equipment perfectly - no measuring required.

Networking Component Solutions from DYMO

DYMO XTL™ and Rhino™ industrial label makers are designed by installers for installers to help you properly label your network installations and meet all ANSI and TIA-606-B industry labelling standards.

XTL All-Purpose and IND Vinyl Labels

Ideal for both indoor and outdoor applications.

- UL recognised as a component to UL 969
- RoHS compliant
- XTL temperature rating: -40°C to 60°C
- IND temperature rating: -40°C to 80°C
- XTL length: 7 m
- IND length: 5.5 m

Available Colours

XTL and IND Heat-Shrink Tube

For high-end cable identification. A 3:1 shrink ratio helps ensure a secure fit on wires and cables.

- UL recognised as a component to UL 224
- Meets MIL-STD-202G, MIL-M-81531 and SAE-DTL 23053/5 (Class 1 & 3)
- RoHS compliant
- XTL temperature rating: Max 125°C
- IND temperature rating: -55°C to 135°C
- XTL length: 2.7 m
- IND length: 1.5 m

Available Colours

XTL Flexible Cable Wrap and IND Flexible Nylon

Specifically designed for curved surfaces and wire and cable marking.

- UL recognised as a component to UL 969
- RoHS compliant
- XTL temperature rating: -40°C to 60°C
- IND temperature rating: -10°C to 80°C
- XTL length: 5.5 m
- IND length: 3.5 m

Available Colours

XTL Laminated Wire/Cable Wrap and IND Self-Laminating

Pre-sized wire/cable wraps with laminated overwrap protect printed areas from oil, chemicals, moisture, abrasion and fading.

- XTL Wraps also available in sheet label formats
- UL recognised as a component to UL 969
- RoHS Compliant
- XTL temperature rating: -40°C to 60°C
- IND temperature rating: -40°C to 80°C

Available Colour

*Black on yellow offered for IND Flexible Nylon labels only

Pipe/Conduit Marking

Marking pipes to the ANSI/ASME A13.1 –2007 Standard

This standard helps to ensure that the information pertaining to a pipe's content, direction of flow, etc. can be quickly seen and identified by anyone within a facility. Elements defined by this standard include the type of information required on pipe markers, as well as the colour, size and placement of the markers.

This reference tool is intended to provide guidance in the creation of ANSI/ASME A13.1– 2007 Standard pipe markers.

3 STEPS TO PROPER PIPE/CONDUIT MARKING

STEP 1 IDENTIFY THE CONTENTS AND FLOW DIRECTION OF THE PIPE

Based on the pipe contents, use the chart to determine the colour of the label and label text that is needed.

STEP 2 USE PIPE DIAMETER TO DETERMINE LABEL SPECIFICATIONS

The length of pipe marker and the size of the letter height on the marker are determined by the outside diameter of the pipe being labelled. Once the outside diameter of the pipe has been measured, use the chart to identify the size of the marker needed.

STEP 3 PLACE MARKERS ON PIPE USING THE FOLLOWING GUIDELINES

- Use arrows at one or both ends of the label to indicate flow direction
- Ensure label placement is visible from the point of normal approach
- Place markers adjacent to any branches, walls, ceilings or floors
- Apply labels at intervals sufficient for identification on straight pipe runs (approx. 7.6 m)

Pro AV/Security

Labelling for Pro AV/Security.

Tasked with the installation and maintenance of communications infrastructures, audiovisual and security professionals are managing many components. Everything from sound boards to video, lighting, and security systems are moving from analog to digital at a rapid pace. As this happens, the practice of labelling and implementing labelling standards like TIA-606-B can help to speed system maintenance and reduce down time.

▶ A properly labelled installation will:

- **SAVE YOU TIME**

Time invested up front can pay off when it comes time to change or repair a connection down the road.

- **SAVE YOU MONEY**

Implement labelling and help take the guesswork out of maintenance and repairs.

- **CREATE CONSISTENCY & FLEXIBILITY**

Labelling helps to ensure consistency across the installation and provides the flexibility to work with different contractors over the life of the installation.

DYMO offers labelling solutions for a variety of needs including:

Cameras

Cables & Wires

Sound Board

Components

Faceplates

Patch Panels

Best practice for network labelling – TIA-606-B

Used throughout the industry, the Telecommunications Industry Association TIA-606-B standard, defines a labelling standard that maps each cable in an installation precisely to the floor, telecom room, and patch panel position or block where the cable terminates. For more information on TIA-606-B visit www.tiaonline.org.

Pro AV/Security Solutions from DYMO

DYMO XTL™ and Rhino™ industrial label makers are designed by installers for installers to help you properly label your installations and meet all ANSI and TIA-606-B industry labelling standards.

Recommended labels for Pro AV/Security

Additional colours and sizes available.
Visit dymo.com.au or dymo.co.nz for details.

XTL All-Purpose and IND Vinyl Labels

Ideal for both indoor and outdoor applications.

- UL recognised as a component to UL 969
- RoHS compliant
- XTL temperature rating: -40°C to 60°C
- IND temperature rating: -40°C to 80°C
- XTL length: 7 m
- IND length: 5.5 m

Available Colours

XTL Continuous & Pre-Sized Heat-Shrink Tube IND Heat-Shrink Tube

For high-end cable identification. A 3:1 shrink ratio helps ensure a secure fit on wires and cables.

- UL recognised as a component to UL 224
- Meets MIL-STD-202G, MIL-M-81531 and SAE-DTL 23053/5 (Class 1 & 3)
- RoHS compliant
- XTL temperature rating: Max 125°C
- IND temperature rating: -55°C to 135°C
- XTL: Varied
- IND: 1.5 m

Available Colours

XTL Flexible Cable Wrap and IND Flexible Nylon

Specifically designed for curved surfaces and wire and cable marking.

- UL recognised as a component to UL 969
- RoHS compliant
- XTL temperature rating: -40°C to 60°C
- IND temperature rating: -10°C to 80°C
- XTL length: 7 m
- IND length: 3.5 m

Retail & Food Service

The right label makes a big difference.

In a retail or food service environment it is important to ensure that employees and patrons can find what they're looking for. Labelling is a cost-effective way to organise and identify items so they can be found quickly and easily. From barcode labels that capture product and pricing information to inventory labels and file folder labels for the back office, DYMO can provide a solution to meet the needs of any operation.

Some ways in which labelling can be used include:

- **COLOUR CODING**

Help organise an operation and prevent cross-contamination with coloured labels. DYMO offers a variety of durable, coloured labels that can aid in implementing an HACCP* colour-coding systems.

- **BARCODING**

Use barcode labels with automated inventory and POS systems to help streamline manual input, increase productivity and reduce errors.

- **STOCK/INVENTORY IDENTIFICATION**

Printed labels help workers easily identify the location of goods and minimise out-of-stock issues.

- **GENERAL OFFICE IDENTIFICATION**

Label files and binders to help make bookkeeping easy and efficient.

Visitor Management

What is visitor management?

Visitor management refers to the process of tracking visitors who enter and exit a facility, creating a record of the building's use. During the visitor check-in process information is often collected from each visitor including name, reason for their visit and the date and time of check-in and check-out.

Types of Visitor Management Systems

There are two common methods for facilitating visitor management systems – pen and paper, and electronic. The pen and paper method often utilises a log book where visitors can sign in and handwrite the required information for check-in and check-out.

An electronic visitor management system uses a computer to record and validate visitor information. Some advantages to this type of system are that they can store a digital record of all check-in/check-out activity, allow for validation of visitor ID against internal and external databases, and enable photo ID printing on name badges for an added level of security.

Common locations for visitor management include:

- Schools
- Office Buildings
- Manufacturing
- Healthcare Facilities
- Daycare
- Government Buildings
- Museums
- Churches
- Events

When integrated with a facility's electronic visitor management process, DYMO LabelWriter® label printers help to provide quick, on-demand printing of name badges to help support the visitor check-in process.

Print any badge you need:

Simple visitor-operated badge printing solutions

Item# SD30856 (non-adhesive)

Included with all DYMO LabelWriter label printers:

Each LabelWriter printer comes with the latest DYMO Label™ software that makes creating customised labels easy with text, images, pictures, date & time, serial numbers, and 20 different types of barcodes

Environmentally friendly

All LabelWriter printers have automatic sleep mode to conserve energy and reduce your costs

Software, Integration & Networking

Make labelling part of your seamless work process.

DYMO®

DYMO ID® Software

DYMO ID - achieving labelling simplicity just got easier.

- Consistent software design between DYMO ID software and XTL label makers make it easy to transition between PC and label printer
- Quickly import data to create a series of labels in just a few steps to eliminate manual entry, saving time and increasing productivity
- Over 200 pre-loaded symbols and images, or simply add a custom image to enhance communication and meet industry standards
- Quick customisation and upgrades – simply plug your XTL label maker into a PC and use DYMO ID software to customise your preferences and keep it up to date
- Works with the DYMO XTL 300 and 500 label makers as well as DYMO XTL Laminated Wire/Cable Wrap Sheet Labels

DYMO Label™ v.8 Software

Great labelling results with a lot less work.

- Available for use with every LabelWriter and PC or Mac®-compatible LabelManager label maker
- Choose from over 100 pre-designed label layouts, then customise with your company logo or graphics
- Built-in address book: Print labels straight from your contact list or from your Outlook® contacts or Mac® Address Book
- Multi application: Create labels directly from Microsoft® Word, Outlook® and Excel® without retyping your text
- QuickPrint widget: Print a single label quickly and easily

DYMO Software Development Kits

Build DYMO technology into your solutions.

- Easily and quickly integrate DYMO label printing into any Windows®, Mac® or Linux® system.
- Get regular updates from our technical team on the DYMO Developer's blog:
<http://developers.dymo.com>

Labelling Solutions Guide

Lined area for notes or calculations.

Why Register?

2+1 Year Warranty

All DYMO® LabelWriter® printers, LabelManager® label makers and XTL™ Industrial machines are covered by a two-year warranty. However, if you register your DYMO® product on dymo.com, you will be entitled to an extra year's warranty.

1+1 Year Warranty

All DYMO® Rhino™ Industrial labelling tools are covered by a one-year warranty. However, if you register your DYMO® product on dymo.com.au or dymo.co.nz you will be entitled to an extra year's warranty.

As a registered user you will receive:

- Technical support
- After-sales service in accordance with the warranty conditions that apply to your product
- Automatic notification of software upgrades
- Helpful hints and tips
- Special offers and new product announcements

Register your DYMO® product on dymo.com.au or dymo.co.nz
